FOR IMMEDIATE RELEASE:
January 19, 2024

The Arkansas Public Service Commission Reminds Customers of the New 327 Area Code Coming to the 870 Area Code Region

LITTLE ROCK--- All customers with the 870 area code should be prepared for 10-digit dialing and the introduction of the new 327 area code. The 327 area code will be added as an overlay to the 870 region. An overlay is the addition of another area code (327) to the same geographic region served by an existing area code (870). **An overlay does not require customers to change their existing area code, but does require customers to dial the area code to complete local calls.**

Beginning **January 19, 2024**, all local calls made within the AR 870 area code must be placed using 10 digits (area code + the 7-digit telephone number). On and after this date, calls placed using just 7 digits will not be completed.

Beginning **February 20, 2024**, new telephone lines or services may be assigned numbers using the new 327 area code.

The **key facts** for consumers to know about the upcoming AR 870/327 area code overlay are:

- Your current telephone number, including current area code, will not change.
- If you seek new phone service on and after February 20, 2024, you may be assigned a phone number with the 327 area code.
- You will need to dial the area code + telephone number for all local calls, including calls within the same area code.
- You will continue to dial 1 + area code + telephone number for all long-distance calls.
- What is a local call now will remain a local call.
- The price of a call, coverage area, or other rates and services will not change due to the overlay.
- You can still dial just three digits to reach 911 and 988. You can also dial three digits to reach 211, 311, 511, 611, 711 and 811 where available.

Important safety and security equipment, such as medical alert devices, and alarm and security systems must be programmed to use 10-digit dialing. Many systems operate on 10-digit dialing by default, but some older equipment may still use 7 digits. Please contact your medical alert or security provider if you are not sure whether your equipment needs to be reprogrammed to accommodate the upcoming change to 10-digit local dialing. Any needed reprogramming of alarm and home security equipment must be completed by January 19, 2024.

Remember that all local calls must be programmed using 10 digits and add '1' for all long-distance calls.
